

## **Vacant Post of Junior Geneticist/Scientific Assistant-Genetics**

West Indies Central Sugar Cane Breeding Station (WICSCBS), located in Barbados, develops sugar cane varieties for the regional industries to produce sugar, rum, ethanol and electricity.

The WICSCBS is inviting applications for the above mentioned position from candidates with Ph D or M Sc in plant breeding or genetics or other relevant fields. Strong background in statistics and interest in field experimentation is desirable. Details of the post are available on request. Also see [WWW.WICSCBS.org](http://WWW.WICSCBS.org). Applications giving a detailed curriculum vitae and names of two references should be send to the Director, West Indies Central Sugar Cane Breeding Station, Groves, St George, BB19073, by email, [wiscscbs@caribsurf.com](mailto:wiscscbs@caribsurf.com) or by post before April 30, 2007.
